

AMENDMENTS TO THE SPECIFICATION

On page 44 of the specification, please amend the third paragraph under the heading Configure Translation Link Details to read as follows:

The Add Translation Details interface provides an easy method of entering data into the WorldServer database table named Translate Link Table (~~see Appendix D about database tables~~). The input fields are described as follows, where the abbreviations in parentheses apply to the example table below:

On page 44 of the specification, please amend the sixth paragraph under the heading Configure Translation Link Details to read as follows:

Target Language (tlang): The two letter abbreviation for language of translated object (jp for Japanese, etc.). ~~See Appendix C for supported character encodings.~~
